1. Identification
Product identifier: BernzOmatic WB-5 Bronze Flux Coated Brazing Rod
Other means of identification:
- SDS number: WC043
Recommended use: Brazing rod.
Recommended restrictions: None known.
Manufacturer/Importer/Supplier/Distributor information:
- Manufacturer/Supplier: Worthington Cylinder Corporation
  - Address: 200 Old Wilson Bridge Road
  - Columbus, OH 43085
  - United States
- Email: cylinders@worthingtonindustries.com
- Telephone Number: 866-928-2657
- CHEMTREC - 24 HOURS: Within US and Canada: 800-424-9300
  - Outside US and Canada: +1 703-741-5970 (collect calls accepted)

2. Hazard(s) identification
Physical hazards: Not classified.
Health hazards: Reproductive toxicity - Category 1B
OSHA defined hazards: Not classified.
Label elements:
- Signal word: Danger
- Hazard statement: May damage fertility or the unborn child.
- Precautionary statement:
  - Prevention: Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection.
  - Response: If exposed or concerned: Get medical advice/attention.
  - Storage: Store locked up.
  - Disposal: Dispose of contents/container in accordance with local/regional/national/international regulations.

3. Composition/information on ingredients
Mixtures

Zinc 7440-66-6  Balance

Coating(s)  Chemical name  CAS number  %
Boric acid  10043-35-3  50 - 80
Borax Glass  -  10 - 30
Methacrylate/Apliphatic & Napthenic Hydrocarbon Compound  NA  Proprietary

Composition comments  All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

4. First-aid measures

Inhalation  Immediately remove from further exposure. Get immediate medical assistance. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Give supplemental oxygen, if available. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

Skin contact  Remove contaminated clothes and rinse skin thoroughly with water for at least 15 minutes. If skin rash or an allergic skin reaction develops, get medical attention.

Eye contact  Rinse immediately with plenty of water for at least 15 minutes. Remove any contact lenses. Get medical attention if irritation develops or persists.

Ingestion  Dust and fumes may irritate eyes, skin and upper respiratory tract. Contact with molten material may cause thermal burns.

5. Fire-fighting measures

Suitable extinguishing media  Extinguish with foam, carbon dioxide or dry powder. Use fire-extinguishing media appropriate for surrounding materials.

Unsuitable extinguishing media  Do not use water or halogenated extinguishing media.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures  Keep unnecessary personnel away. Avoid inhalation of dust from the spilled material. Wear protective clothing as described in Section 8 of this SDS. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Methods and materials for containment and cleaning up  Stop leak if you can do so without risk. Local authorities should be advised if significant spillages cannot be contained.

Environmental precautions  Prevent further leakage or spillage if safe to do so. Do not contaminate water. If release occurs in the U.S. and is reportable under CERCLA Section 103, notify the National Response Center at (800)424-8802 (USA) or (202)426-2675 (USA).
7. Handling and storage

Precautions for safe handling

Wear appropriate personal protective equipment (See Section 8). Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. Avoid inhalation of dust and fumes. Avoid contact with skin and eyes. Do not get this material on clothing. Do not eat, drink or smoke when using the product. Wash thoroughly after handling. Avoid release to the environment.

Any surface that comes in contact with molten metal must be preheated or specially coated and rust free. Inadvertent contaminants to product such as moisture, ice, snow, grease, or oil can cause an explosion when charged to a molten metal bath or metal furnace (preheating metal will remove moisture from product).

Conditions for safe storage, including any incompatibilities

Store in tightly closed original container in a dry, cool and well-ventilated place. Store in a closed container away from incompatible materials. Keep out of reach of children. Keep away from food, drink and animal feedingstuffs.

8. Exposure controls/personal protection

Occupational exposure limits

**Biological limit values**

No biological exposure limits noted for the ingredient(s).

**Exposure guidelines**

No exposure standards allocated.

**Appropriate engineering controls**

Provide adequate ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of dust. Keep melting/soldering temperatures as low as possible to minimize the generation of fume. Shower, hand and eye washing facilities near the workplace are recommended.
Individual protection measures, such as personal protective equipment

**Eye/face protection**
Wear safety glasses with side shields (or goggles). Wear a face shield when working with molten material.

**Skin protection**
- **Hand protection**: Wear protective gloves (i.e. latex, nitrile, neoprene).
- **Other**: Chemical resistant clothing is recommended.

**Respiratory protection**
Use a respirator when local exhaust or ventilation is not adequate to keep exposures below the OEL. In a confined space a supplied respirator may be required. Selection and use of respiratory protective equipment should be in accordance with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

**Thermal hazards**
Heat resistant/insulated gloves and clothing are recommended when working with molten material.

**General hygiene considerations**
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Observe any medical surveillance requirements.

9. **Physical and chemical properties**

**Appearance**
- **Physical state**: Solid.
- **Form**: Bare or coated rods.
- **Color**: Bronze.
- **Odor**: Odorless.
- **Odor threshold**: Not available.
- **pH**: Not applicable.

**Melting point/freezing point**
- Zinc: 786.2 °F (419 °C)
- Copper: 1981.4 °F (1083 °C)

**Initial boiling point and boiling range**
- Copper: 1664.6 °F (907 °C)
- Zinc: 4172 °F (2300 °C)

**Flash point**: Not applicable.

**Evaporation rate**: Not available.

**Flammability (solid, gas)**
- **Upper/lower flammability or explosive limits**
  - Flammability limit - lower (%): Not available.
  - Flammability limit - upper (%): Not available.
  - Explosive limit - lower (%): Not applicable.
  - Explosive limit - upper (%): Not applicable.

**Vapor pressure**
- Copper: 1 mm Hg @1628°C
- Zinc: 1 mm Hg @487°C

**Vapor density**
Not applicable.

**Relative density**
- Copper: 8.9 (H2O=1)
- Zinc: 7.14 (H2O=1)

**Solubility(ies)**
- **Solubility (water)**: Not soluble
- **Partition coefficient (n-octanol/water)**: Not available.

**Auto-ignition temperature**: Not applicable.

**Decomposition temperature**: Not available.

**Viscosity**: Not available.

10. **Stability and reactivity**

**Reactivity**: The product is non-reactive under normal conditions of use, storage and transport.

**Chemical stability**: Material is stable under normal conditions.
Hazardous polymerization does not occur.

**Conditions to avoid**
Contact with incompatible materials. Avoid molten metal contact with water.

**Incompatible materials**
Strong acids. Strong oxidizing agents. Halogenated compounds.

**Hazardous decomposition products**
Toxic metal oxides are emitted when heated above the melting point.

### 11. Toxicological information

#### Information on likely routes of exposure

**Inhalation**
Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the mucous membranes and respiratory tract. Lung damage and possible pulmonary edema can result from dust exposure. Inhalation of fumes may cause a flu-like illness called metal fume fever.

**Skin contact**
Dust may irritate skin. Contact with molten material may cause thermal burns.

**Eye contact**
Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye.

**Ingestion**
Ingestion of dusts generated during working operations may cause nausea and vomiting. Copper poisoning can result in hemolytic anemia and kidney, liver and spleen damage.

#### Symptoms related to the physical, chemical and toxicological characteristics

Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye, mucous membranes and respiratory tract. Contact with molten material may cause thermal burns.

#### Information on toxicological effects

**Acute toxicity**
High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. When heated, the vapors/fumes given off may cause respiratory tract irritation. Acute overexposure to Copper dust/fume can cause irritation of the eyes, nose, throat, and skin and under severe fume overexposure can cause metal fume fever with flu-like symptoms such as sweet metal taste, dry throat, coughing, fever and chills, tight chest, dyspnea, headache, blurred vision, back pain, nausea, vomiting, fatigue. Symptoms usually disappear within 24 hours. Copper may cause skin and hair discoloration. Inhalation of copper dusts may change the gums and mucous lining of the mouth which is generally attributable to localized tissue effect rather than general toxicity.

**Skin corrosion/irritation**
Dust may irritate skin.

**Serious eye damage/eye irritation**
Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye.
Respiratory or skin sensitization
Respiratory sensitization: No sensitizing effects known.
Skin sensitization: No sensitizing effects known.
Germ cell mutagenicity: Not classifiable as to carcinogenicity to humans.
Carcinogenicity: No data available.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not listed.

Reproductive toxicity: May damage fertility or the unborn child.
Specific target organ toxicity - single exposure: Not classified.
Specific target organ toxicity - repeated exposure: Not classified.
Aspiration hazard: Not relevant, due to the form of the product.
Chronic effects: Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis).
Further information: No other specific acute or chronic health impact noted.

12. Ecological information

Ecotoxicity: Alloys in massive forms present a limited hazard for the environment. The product contains a substance which is very toxic to aquatic organisms and which may cause long-term adverse effects in the aquatic environment.

<table>
<thead>
<tr>

</tbody>
</table>

Persistence and degradability: The product is not biodegradable.
Bioaccumulative potential: No data available.
Mobility in soil: Alloys in massive forms are not mobile in the environment.
Other adverse effects: None expected.

13. Disposal considerations

Disposal instructions: Dispose in accordance with all applicable regulations.
Local disposal regulations: Dispose of in accordance with local regulations.
Hazardous waste code: Waste codes should be assigned by the user based on the application for which the product was used.
Waste from residues / unused products: Dispose of in accordance with local regulations. Scrapped material should be sent for refining to recover precious metal content. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.
Contaminated packaging: Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

DOT: Not regulated as dangerous goods.
IATA: Not regulated as dangerous goods.
IMDG: Not regulated as dangerous goods.
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code: Not applicable.

15. Regulatory information

US federal regulations: This product is considered hazardous under 29 CFR 1910.1200 (Hazard Communication). All components are on the U.S. EPA TSCA Inventory List.
TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
Not regulated.
