

ASME	INCHES	MM
DIAMETER	10-30	254 - 762
LENGTH	24-144	610 - 3,658

Please inquire for custom sizes or configurations.

Standard Fittings & Accessories

- Service valve
- Fill valve with OPD
- Fixed liquid level
- Pressure relief (45 degree outlet)
- Liquid level gauge
- Mounting brackets (standard configuration or custom)

Options

- Liquid or vapor service
- Custom design fabrication available
- Tanks are designed for direct or vapor injection systems

Other Features

- ASME data plate made of stainless steel and is seal welded to tank
- All pressure containing welds are done robotically for optimum weld quality
- 100% pressure tested
- 20-30% weight savings achieved by using a full x-ray process on welds

Constructed in accordance with ASME Code. Registered at National Board meeting requirements of NFPA 58 and are approved for use in all 50 US states. Canadian registration is available upon request.

Superior Corrosion Resistance

- Standard powder coat exceeds 1000 hour salt spray test per ASTM B117 specifications
- An additional powder coat is available that exceeds a 5000 hour salt spray test for applications looking at an increased level of corrosion resistance.
